SAL — System of AI Responsibility Layer (Whitepaper)

Author: Oleksii Poshvaniuk
Year: 2026

Version: v0.1

Executive Summary: SAL proposes a responsibility layer for AI behavior, independent of performance metrics.

Problem Statement: There is no accountability layer for AI comparable to CAPTCHA for humans.

Core Concept: SAL evaluates contextual responsibility, refusal integrity, and long-term trust.

Legal Position: SAL is a conceptual framework, not a decision-maker or truth authority.
